

Installing Spark

1. Install scala

Sudo apt-get install scala

2. Download spark from <https://spark.apache.org/downloads.html>

3. Unzip files with

```
tar xvf file name
```

4. Copy spark-env.sh.template to spark-env.sh

5. Update spark-env.sh and set java home and master node

```
export SPARK_MASTER_HOST='<MASTER-IP>'
```

```
export JAVA_HOME=<Path_of_JAVA_installation>
```

6. Update slaves file and set slave nodes

7. Start spark with ./sbin/start-all.sh
